1. Install an android apk through ADB on either an emulator or an actual device

QUESTION 1

1. Go to the home menu and click on the first app available on the launcher, all via ADB.

Command: adb shell am start -c api.android.intent.LAUNCHER -a api.android.category.MAIN -n com.goog

2. Go to the home menu and long tap the first 3 apps available on the launcher, all via ADB.

3. Using ADB, verify the device's current WiFi status (on/off)

4. Using ADB, activate the device's rotation lock.

5. Using ADB, launch the contacts app and add a new contact to the contact's list.
